An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gary Fabian on March 2, 2005.

The application has been amended as follows:

In claim 15, line 1, the words—on a computer readable medium—have been inserted after the word databases.

This change was made to avoid a potential problem under 35 U.S.C. 101, as a database, like a computer program, in and of itself, is not a tangible thing. As amended, the database is stored on a tangible medium and therefore the claim is statutory.

The following is an examiner's statement of reasons for allowance: Claims 1-19, and 21-37 define over the art in that none of the art show the method of manipulating a database or a database that has error messages associates with skipped measurements stored with data attributes. The examiner notes that skipped measurements are defined on page 17, lines 24-30, as measurements that are obtained but are deemed faulty or on correct, and invalid as a result. It is not that the data is merely above an alarm level, indicative of an alarm condition.

The examiner notes that the Kumar reference, 6,416,417, cited by applicant displays a message that the user did not comply and take a measurement. While this

may seem to be a "skipped" measurement, in that the user skipped the measurement, it does not meet the definition on page 17.

The examiner notes that the claims would be subject to an obvious type double patenting rejection of the parent application, 6,633,772 and application 10/460557, but applicant submitted a terminal disclaimer prior to examination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Chandler et al 2004/0267568 and Reinhoff Jr. et al 2003/0208454 both show databases including analyte measurement values.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert L. Nasser whose telephone number is (571) 272-4731. The examiner can normally be reached on Mon-Fri, variable hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on (571) 272-4726. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
